Professional Profile

I am a **Full-Stack Developer** with experience in React, Node.js, Python, TypeScript, and SQL databases (especially PostgreSQL). I am passionate about building complete and efficient web applications, with a strong focus on user experience. I pay close attention to detail and ensure that each project is scalable, reliable, and intentionally designed. Constantly learning, I enjoy researching, experimenting, and applying new knowledge to stay up to date and deliver innovative value in every project.

Work Experience

TREMGroup – Front-End Developer   *Jan 2023 – Present*

- Development of the IDX Boost CMS, contributing to the continuous evolution and maintenance of the product.
- Creation of dynamic components (*SelectableItem, ModalEditor*) to enhance content management.
- Implementation of management modules, such as assigning tripwires to specific websites.
- Progressive migration of the system to TypeScript, incorporating best development practices.
- Maintenance, bug fixing, and optimization of existing functionalities.
- Support for additional internal company projects.

Valtec Consultores – Full-Stack Developer   *Jan 2022 – Aug 2023*

- Development of web applications with React.js, prioritizing modern and optimized interfaces.
- Creation and integration of REST APIs for service communication.
- Design and development of complete projects, from architecture to implementation.
- Implementation of REST APIs with .NET and SQL Server for data management.
- Cloud deployment focused on scalability and availability.
- Development of an IoT application connected to sensors using Google Cloud (*Pub/Sub, Cloud Functions, Firestore, Cloud Run*).

Killa House Hotel – Front-End Developer   *Jul 2016 – Jul 2017*

- Complete website redesign to improve user experience.
- Development of a custom booking plugin for managing online requests.
- Implementation of an automated email system, improving client communication.
- Optimization of Excel tools for controlling payments and consumption.

Llika Inversiones – Front-End Developer   *Jun 2015 – Jun 2016*

- Implementation of a booking plugin for Machu Picchu visits.
- Development of more than 10 custom Drupal themes optimized for performance.
- Design and development of tailor-made web projects for various clients.
- Maintenance and optimization of web applications prioritizing usability.

Relevant Projects

IDX Boost CMS – TREMGroup Participation in the evolution of the CMS used by real estate clients in the U.S. *React.js, TypeScript, JavaScript, Tailwind CSS*
